GEO Audit Report

www.elitetouchrenovations.au

81/100

Good — GEO Readiness Score

Business Type: **Other** • Pages Analyzed: **18** • Date: **2026-08-20 11:43:16**

Executive Summary

www.elitetouchrenovations.au has a **solid technical foundation** (server-side rendered, 4 security headers, clean URL structure) that makes it highly accessible to AI crawlers. However, the site underperforms in **Brand Authority** (36/100) and **Schema Markup** (45/100).

The biggest opportunity: 14 AI crawlers have access (including GPTBot, OAI-SearchBot, ChatGPT-User). Brand signals exist on Youtube, but Reddit and Wikipedia and LinkedIn presence is missing — Wikipedia is the single strongest entity recognition signal for AI models. Schema markup includes HomeAndConstructionBusiness, but Organization schema is missing — critical for entity recognition.

Projected score after implementing priority actions: 99-100/100 (+18-26 points)

Priority actions: 1. Deploy `llms.txt` and `llms-full.txt` (+3-5 points) 2. Implement Organization schema with sameAs links (+5-8 points) 3. Create Wikidata entity for brand recognition (+3-5 points) 4. Build organic Reddit presence in relevant subreddits (+2-4 points)

GEO Score Breakdown

The GEO score is a weighted composite of six key areas that determine how well your site performs in AI-powered search engines.

Formula: Citability (25%) + Brand Authority (20%) + Content E-E-A-T (20%) + Technical SEO (15%) + Schema Markup (10%) + Platform Readiness (10%) = **81/100**

CATEGORY	WEIGHT	SCORE	GRADE
AI Citability	25%	51/100	Poor
Brand Authority	20%	36/100	Poor
Content E-E-A-T	20%	60/100	Fair
Technical SEO	15%	81/100	Good
Schema Markup	10%	45/100	Poor
Platform Readiness	10%	66/100	Fair

Note: AI analysis was unavailable during this audit. The following categories used deterministic estimates: content_eeat, platform. Re-run the audit for full AI-powered analysis.

AI Platform Readiness Scores

How well your site is optimized for each major AI search platform.

PLATFORM	SCORE	READINESS
Google AI Overviews	0/100	Weak
ChatGPT Web Search	0/100	Weak
Perplexity AI	0/100	Weak
Google Gemini	0/100	Weak
Bing Copilot	0/100	Weak

Key Metrics at a Glance

A summary of the most important quantitative signals found across your site.

Content Metrics

Metric	Value	Assessment
Pages Analyzed	18	Sufficient sample size
Average Words per Page	1458	Good content depth
Average Citability Score	51/100	Poor
Total Images	118	—
Alt Text Coverage	85%	Good

Link Structure

Metric	Value
Avg Internal Links per Page	14
Avg External Links per Page	3
Pages with H1 Issues	0

Structured Data & AI Discoverability

Metric	Value
Schema Types Found	HomeAndConstructionBusiness
llms.txt File	Missing — recommended to create one

E-E-A-T Analysis

E-E-A-T (Experience, Expertise, Authoritativeness, Trustworthiness) is Google's quality framework. AI search engines heavily weight these signals when deciding which content to cite. Your combined E-E-A-T score is **60/100** (Fair).

PILLAR	SCORE	MAX	EVIDENCE SIGNALS
Experience	15	/25	Avg 1458 words/page (in-depth content)
Expertise	10	/25	5 H2 subheadings (structured expertise)
Authoritativeness	15	/25	3 outbound authority links; About / Team page found
Trustworthiness	20	/25	HTTPS enabled; 4 security headers present; Contact / Support page found

What This Means

- Experience** measures first-hand knowledge signals — case studies, original data, user testimonials.
- Expertise** evaluates depth of subject-matter coverage — author credentials, technical accuracy, comprehensive explanations.
- Authoritativeness** assesses domain recognition — backlinks from authoritative sources, brand mentions, industry citations.
- Trustworthiness** looks at credibility signals — HTTPS, privacy policies, contact information, editorial standards.

AI Crawler Access

AI search engines use crawlers to index your content. Blocking these crawlers means your content cannot appear in AI-generated answers. Out of 14 crawlers checked: **14 allowed**, **0 blocked**, 0 not mentioned in robots.txt.

CRAWLER	STATUS	IMPLICATION
GPTBot	Allowed	Content can appear in this platform's AI answers
OAI-SearchBot	Allowed	Content can appear in this platform's AI answers
ChatGPT-User	Allowed	Content can appear in this platform's AI answers
ClaudeBot	Allowed	Content can appear in this platform's AI answers
PerplexityBot	Allowed	Content can appear in this platform's AI answers
Google-Extended	Allowed	Content can appear in this platform's AI answers
GoogleOther	Allowed	Content can appear in this platform's AI answers
Applebot-Extended	Allowed	Content can appear in this platform's AI answers
Amazonbot	Allowed	Content can appear in this platform's AI answers
FacebookBot	Allowed	Content can appear in this platform's AI answers
CCBot	Allowed	Content can appear in this platform's AI answers
anthropic-ai	Allowed	Content can appear in this platform's AI answers
Bytespider	Allowed	Content can appear in this platform's AI answers
cohere-ai	Allowed	Content can appear in this platform's AI answers

Key Findings (0 total)

Issues discovered during the audit, organized by severity. Critical and High severity items should be addressed first as they have the greatest impact on your AI search visibility.

No findings recorded.

Prioritized Action Plan

Recommended actions organized by implementation timeline. Quick wins can be done immediately with minimal effort. Medium-term actions require more planning. Strategic initiatives are long-term investments.

Citability Analysis

Citability measures how likely AI systems are to quote or reference your content in their answers. A score of 70+ means your content is structured in ways that AI models prefer to cite. Your average score across 18 pages is **51/100** (Poor).

Highest Scoring Pages

PAGE URL	SCORE	GRADE
/packages/	59/100	Fair
/contact-us/	55/100	Fair
/services/bathroom-renovations/hills-district/	54/100	Poor
/services/bathroom-renovations/eastern-suburbs/	54/100	Poor
/	52/100	Poor

Lowest Scoring Pages (Priority for Improvement)

PAGE URL	SCORE	GRADE
/services/bathroom-renovations/	46/100	Poor
/services/ensuite-bathroom-renovations/	48/100	Poor
/services/laundry-renovations/	48/100	Poor
/services/powder-room-renovations/	48/100	Poor
/services/	51/100	Poor

Top Citation-Ready Content Blocks

These are specific content sections that AI models are most likely to cite directly.

Technical SEO Breakdown

Technical SEO ensures search engines (both traditional and AI-powered) can crawl, render, and understand your site. Each category below is scored independently.

CATEGORY	SCORE	MAX	STATUS
Crawlability	15	15	PASS
Indexability	8	12	WARN
Security	9	10	PASS
URL Structure	8	8	PASS
Mobile	4	6	WARN
Core Web Vitals	13	15	PASS
Server-Side Rendering	15	15	PASS
Page Speed	9	12	WARN

Indexability — Failed Checks

CHECK	DETAILS	POINTS LOST
Title tag optimized	Title: "Sydney Bathroom Renovations Family-Run Specialists Elite Touch Renovations" (78 chars)	-2
Meta description	Missing or too long	-2

Core Web Vitals — Failed Checks

CHECK	DETAILS	POINTS LOST
INP (estimated)	Estimated from script count (12) — not real field data	-2

Technical Findings

SEVERITY	FINDING	DESCRIPTION
LOW	Core Web Vitals are estimated	CWV scores (LCP, INP, CLS) are estimated from HTML heuristics, not Chrome UX Report field data. Use PageSpeed Insights or CrUX API for accurate measurements.

Brand Authority Analysis

AI models build entity understanding from brand mentions across high-authority platforms. A strong brand presence on these platforms increases the likelihood that AI will recognize, trust, and cite your content. Brand searched: **au**.

Platform	Present	Score	Weight	Details
YouTube	Yes	85/100	25%	YouTube channel found at https://www.youtube.com/@au
Reddit	No	0/100	25%	No Reddit presence detected
Wikipedia	No	0/100	20%	No Wikipedia or Wikidata presence found
LinkedIn	No	35/100	15%	LinkedIn cannot be verified automatically (anti-bot protection) — assumed baseline presence. Verify manually for accurate score.
Others (GitHub)	Yes	60/100	15%	GitHub: 5 repo(s) found — also verify Quora, Stack Overflow, G2, Trustpilot manually

Brand Recommendations

1. Keep YouTube channel active with regular uploads
2. Add product demos and tutorials
3. Participate authentically in relevant subreddits
4. Avoid promotional content — be helpful and specific
5. Assess notability criteria for Wikipedia article creation
6. Create a Wikidata item with key properties (instance of, official website, social media)

Schema & Structured Data

Schema markup helps AI systems understand the type and context of your content. JSON-LD is the preferred format for both Google and AI search engines.

METRIC	VALUE	ASSESSMENT
Format	json-ld	Optimal format
Server Rendered	Yes	AI crawlers can access it
Detected Schema Types	1	—
Missing Recommended	3	Action needed

Detected Schema Types

TYPE	VALID
HomeAndConstructionBusiness	Valid

Missing Recommended Schemas

The following schema types are recommended for your site type but were not found:

- Organization
- WebSite + SearchAction
- BreadcrumbList

sameAs Links (Entity Linking)

sameAs links in your Organization schema help AI models connect your brand across platforms.

PLATFORM	STATUS
wikipedia	Missing — add to Organization schema
wikidata	Missing — add to Organization schema
linkedin	Linked
youtube	Linked
twitter	Missing — add to Organization schema
github	Missing — add to Organization schema
crunchbase	Missing — add to Organization schema

llms.txt Status

llms.txt is an emerging standard (like robots.txt) that helps AI systems understand your site structure and preferred content for citation.

CHECK	RESULT
File Exists	No
Valid Format	No
Score	0/100

Recommendation: Create a llms.txt file at your domain root. This is one of the easiest quick wins for improving AI visibility. The file should list your most important pages and describe your organization for AI systems.

Per-Page Citability Analysis (18 pages)

Each page is scored on 5 dimensions that determine how likely AI systems are to cite it: Answer Quality, Self-Containment, Structure, Statistical Density, and Uniqueness.

PAGE URL	SCORE	GRADE	TOP RECOMMENDATION
